## 10/583363 AP3 Rec'd PCT/PTO 19 JUN 2005

# RITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

PCT/GB2004/005351

#### Re Item IV.

The separate groups of inventions are:

Group 1 Claims: 1-5,14,15

directed to an umbrella head designed to be supported on a pole.

Group 2 Claims: 6-13,16

directed to a clamp for holding two elongate members.

They are not so linked as to form a single general inventive concept (Rule 13.1 PCT) for the following reasons:

The definitions of the different (groups of) claimed inventions are only intended to identify said inventions in a concise manner. They may well, as such, comprise terms or generalisations which upon a close analysis could be found to extend the defined subject matter beyond the contents of the applications as filed.

The technical features of the first group of claims solve the apparent problem of improving the attaching of the umbrella to the pole by using a clamp.

The technical features of the second group of claims solve the apparent problem of improving the holding of two elongate members by using a cooperating engaging surfaces of the two parts constituting the clamp.

Different solutions are proposed for different problems and it would appear that all the claimed inventions can be applied independently of each other. Moreover this is described also in the description:

page 1 lines 1 to 3: "The present invention relates to a clamp (...) and to a pendulum umbrella" page 1 line 36 and page 3 line 29: "first aspect/second aspect"

page 9 line 1 to 2: "it would also be possible to use different clamps..."

From the cited passages it is clear that the two invention (the umbrella and the clamp) can be applied independently of each other.

## RITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

The subject of the groups of claims 1 and 2, defined by the problems posed and their means of solution, are thus so different from each other that no technical relationship or interaction can be appreciated to be present so as to form a single general inventive concept; except that all devices or methods are used in treating food, which is per se well known (see the docs cited in the partial search report).

Hence the application does not meet the requirements of unity of invention (Rules 13.1, 13.2, 13.3 PCT).

#### Re Item V.

1 Reference is made to the following documents:

D1: US 4 586 525 A (GLATZ ET AL) 6 May 1986 (1986-05-06)

D2: US 2003/127120 A1 (WOLCOTT STEVE) 10 July 2003 (2003-07-10)

D3: US 5 611 364 A (WOODS ET AL) 18 March 1997 (1997-03-18)

#### 2 INDEPENDENT CLAIM 1

2.1 The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 1 is not new in the sense of Article 33(2) PCT.

Document D1 discloses (the references in parentheses applying to this document):

An umbrella head (82) designed to be supported on a pole (4), the umbrella head having a shaft portion (fig 6), ribs (92) extending outwardly from the shaft to support a cover, a runner (96) slidably mounted on the shaft portion and stretchers (94) extending radially from the said runner to the ribs, and a clamp\* (22) for releasably attaching the umbrella head to the pole, the umbrella head clamp (22) being disposed at the top of the shaft.

\* The term "clamp" is given the significance: "device for holding things together" (see Oxford dictionary), therefore any means (like the hook(22) of D1) which can hold together the umbrella head and the pole and which is suitable for releasably attaching the umbrella head to the pole will fall under the meaning of the term "clamp" of present

independent claim 1.

#### 3 DEPENDENT CLAIMS 2, 3, 4, 5, 14, 15

Dependent claims 2, 3, 4, 5, 14, 15 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty and/or inventive step (Article 33(2) and (3) PCT) either because they are known from the documents cited in the international Search Report, either because they are very well known features and their use would be obvious to the person skilled in the art.

#### 4. INDEPENDENT CLAIM 6

The prior published documents, cited in the international search report, either taken individually or in combination do not disclose, suggest or reasonably lead the person skilled in the art to consider a clamp device comprising all the features claimed in present claim 1 in the known clamps for holding two elongated members.

The person skilled in the art would not be able to combine all the features of the present independent claim and as such arrive at the claimed devices or methods without an inventive activity.

#### 5. DEPENDENT CLAIMS 7-13

Dependent claims 7 to 13 are dependent on claim 6, and thus they satisfy the requirements of Article 33(2)(3) PCT.

#### 6. INDEPENDENT CLAIM 16

The prior published documents, cited in the international search report do <u>not</u> disclose, suggest or reasonably lead the person skilled in the art to consider a kit comprising clamps according to claim 6.
